## XPG RGB Software Instruction

### 1. Profiles

- ◆ Area 1: There are four profiles for you to customize. Select the profile, customize it, and click “Apply” to save the profile settings.
- ◆ Area 2: Clicking on the “Reset” button will revert the profile back to its default settings.
- ◆ Area 3: Click “Apply” to save your customized profile settings.

### 2. Lighting Effect — Static

- ◆ Area 1: Click on the desired LED (“LED 1 to LED 8”) to be adjusted. To sync all the LEDs with “LED 1” click “Sync to LED 1.”
- ◆ Area 2: Adjust colors as follows:

- ① Click on the desired color on the color ring (or drag the white knob onto the desired color).
  - ② Input the RGB values directly (or drag the white knobs corresponding to R, G, B, S). S is color saturation.
  - ③ Input HEX value directly
- ◆ Area 3: Five preset colors
  - Area 4: LED On/Off switch
  - Area 5: Brightness adjustment

After achieving the desired settings, click “Apply” to save.

3. **Lighting Effect — Breathing**

- ◆ Area 1: Click on the desired LED (“LED 1 to LED 8”) to be adjusted. To sync all the LEDs with “LED 1” click “Sync to LED 1.”
- ◆ Area 2: Adjust colors as follows:
  - ① Click on the desired color on the color ring (or drag the white knob onto the desired color).
  - ② Input the RGB values directly (or drag the white knobs corresponding to R, G, B, S). S is color saturation.
  - ③ Input HEX value directly
- ◆ Area 3: Five preset colors
- Area 4: LED On/Off switch
- Area 5: Brightness adjustment
- Area 6: Light effect speed adjustment. To speed up adjust the knob to the left and vice versa to slow down.

After achieving the desired settings, click “Apply” to save.

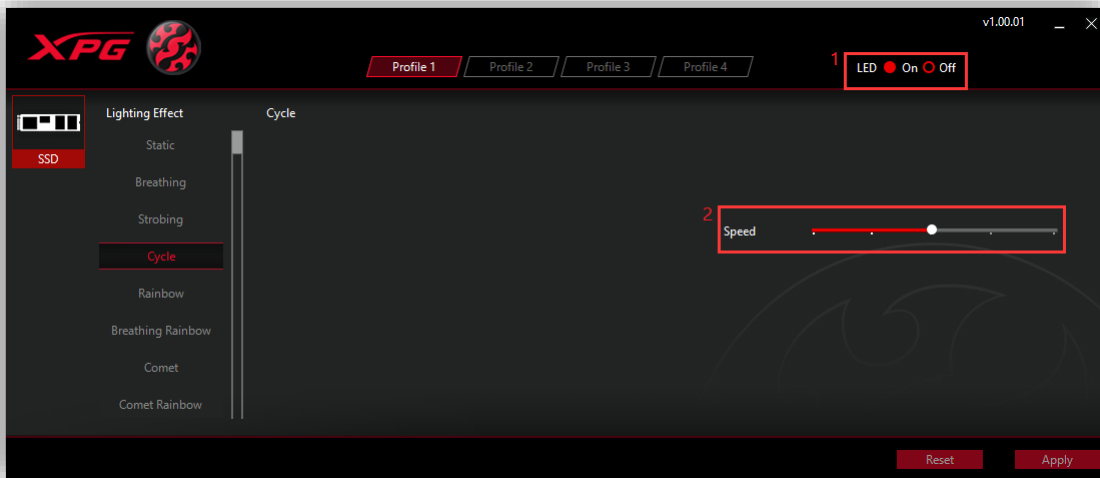

4. Lighting Effect – Strobing

- ◆ Area 1: Click on the desired LED (“LED 1 to LED 8”) to be adjusted. To sync all the LEDs with “LED 1” click “Sync to LED 1.”
- ◆ Area 2: Adjust colors as follows:
  - ① Click on the desired color on the color ring (or drag the white knob onto the desired color).
  - ② Input the RGB values directly (or drag the white knobs corresponding to R, G, B, S). S is color saturation.
  - ③ Input HEX value directly
- ◆ Area 3: Five preset colors
- Area 4: LED On/Off switch
- Area 5: Brightness adjustment
- Area 6: Light effect speed adjustment. To speed up adjust the knob to the left and vice versa to slow down.

After achieving the desired settings, click “Apply” to save.

5. Lighting Effect — Cycle

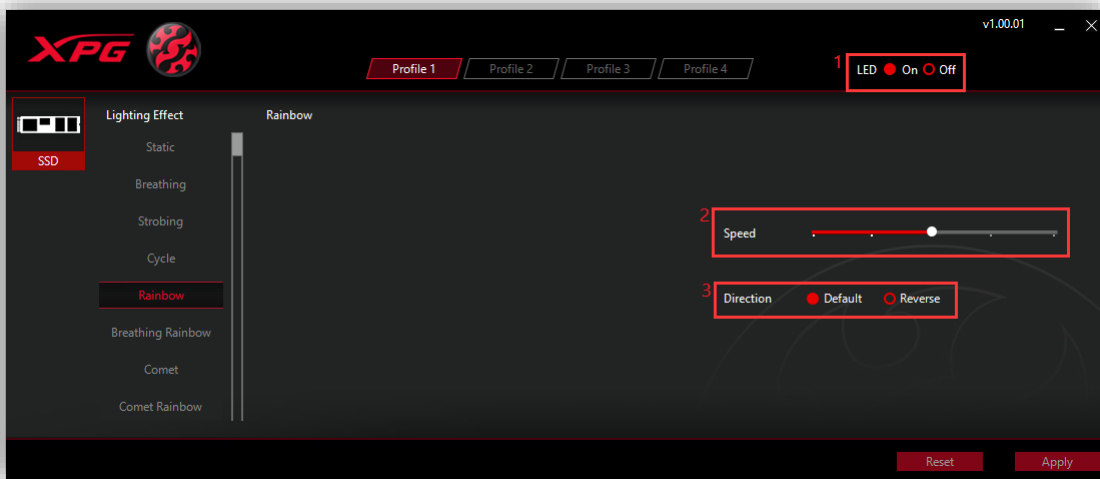

◆ Area 1: LED On/Off switch
