# Safety

## **National Conventions**

The following subsections describe notational conventions used in this document.

#### Notes, Cautions, and Warnings

Throughout this guide, blocks of text may be accompanied by an icon and printed in bold type or in italic type. These blocks are notes, cautions, and warnings, and they are used as follows:

NOTE: A NOTE indicates important information that helps you make better use of your computer system.

CAUTION: A CAUTION indicates either potential damage to hardware or loss of data and tells you how to avoid the problem.

**WARNING:** A WARNING indicates the potential for bodily harm and tells you how to avoid the problem. Some warnings may appear in alternate formats and may be unaccompanied by an icon. In such cases, the specific presentation of the warning is mandated by regulatory authority.

### Power

The monitor should be operated only from the type of power source indicated on the label. If you are not sure of the type of power supplied to your home, consult your dealer or local power company.

The monitor is equipped with a three-pronged grounded plug, a plug with a third (grounding) pin. This plug will fit only into a grounded power outlet as a safety feature. If your outlet does not accommodate the three-wire plug, have an electrician install the correct outlet, or use an adapter to ground the appliance safely. Do not defeat the safety purpose of the grounded plug.

Unplug the unit during a lightning storm or when it will not be used for long periods of time. This will protect the monitor from damage due to power surges.

A Do not overload power strips and extension cords. Overloading can result in fire or electric shock.

To ensure satisfactory operation, use the monitor only with UL listed computers which have appropriate configured receptacles marked between 100-240V AC, Min. 5A.

A The wall socket shall be installed near the equipment and shall be easily accessible.

### Installation

Do not place the monitor on an unstable cart, stand, tripod, bracket, or table. If the monitor falls, it can injure a person and cause serious damage to this product. Use only a cart, stand, tripod, bracket, or table recommended by the manufacturer or sold with this product. Follow the manufacturer's instructions when installing the product and use mounting accessories recommended by the manufacturer. A product and cart combination should be moved with care.

Never push any object into the slot on the monitor cabinet. It could damage circuit parts, causing a fire or electric shock. Never spill liquids on the monitor.

🔥 Do not place the front of the product on the floor.

🚹 If you mount the monitor on a wall or shelf, use a mounting kit approved by the manufacturer and follow the kit instructions.

#### A WARNING: SUPPLY LINES! DANGER TO LIFE BY ELECTRIC SHOCK!

Take appropriate measures to avoid damaging supply lines (electric, gas, water) during wall mounting.

Leave some space around the monitor as shown below. Otherwise, air-circulation may be inadequate, hence overheating may cause a fire or damage to the monitor.

See below the recommended ventilation areas around the monitor when the monitor is installed on the wall or on the stand:

#### Installed with stand

## Cleaning

Clean the cabinet regularly with a water-dampened, soft cloth.

When cleaning use a soft cotton or microfiber cloth. The cloth should be damp and almost dry, do not allow liquid into the case.

Please disconnect the power cord before cleaning the product.

## Other

/ If the product is emitting a strange smell, sound or smoke, disconnect the power plug IMMEDIATELY and contact a Service Center.

A Make sure that the ventilating openings are not blocked by a table or curtain.

🕂 Do not engage the LCD monitor in severe vibration or high impact conditions during operation.

🕂 Do not knock or drop the monitor during operation or transportation.

### ANGER TO LIFE AND RISK OF ACCIDENTS FOR INFANTS AND CHILDREN!

Never leave children unsupervised with the packaging material. The packaging material poses a suffocation hazard. Children frequently underestimate dangers.

Always keep children away from the product.

A Keep all documents for future use. When passing this product on to third parties, please include the installation instructions and safety notes.

Do not place the device near a heat source and protect it from direct sunlight.

🕂 Never expose the device to humidity, condensation or moisture.

# Setup

## **Contents in Box**

Not all signal cables will be provided for all countries and regions. Please check with the local dealer or AOC branch office for confirmation.

For use only with the attached power adapter Manufacturers: TPV ELECTRONICS (FUJIAN) CO.,LTD. Model:ADPC20120 (output: 20Vdc,6.0A)

## Setup Stand & Base

Please setup or remove the base following the steps as below.

#### Setup:

Remove:

## Adjusting the monitor

For optimal viewing it is recommended to look at the full face of the monitor, then adjust the monitor's angle to your own preference. Hold the stand so you will not topple the monitor when you change the monitor's angle. You are able to adjust the monitor as below:

## 

Do not touch the LCD screen when you change the angle. It may cause damage or break the LCD screen.

## **Connecting the Monitor**

Cable Connections In Back of Monitor and Computer:

- 1. DC IN
- 2. USB UP
- 3. USB+fast charging
- 4. USB 3.2 Gen1
- 5. Microphone in
- 6. Earphone (Combined with Microphone)
- 7. HDMI1
- 8. HDMI2
- 9. DP IN1
- 10. DP IN2
- 11. Microphone out (Connect to PC)

#### Connect to PC

- 1. Connect the power cord to the back of the display firmly.
- 2. Turn off your computer and unplug its power cable.
- 3. Connect the display signal cable to the video connector on the back of your computer.
- 4. Plug the power cord of your computer and your display into a nearby outlet.
- 5. Turn on your computer and display.

If your monitor displays an image, installation is complete. If it does not display an image, please refer Troubleshooting.

To protect equipment, always turn off the PC and LCD monitor before connecting.

## Adaptive-Sync function

- 1. Adaptive-Sync function is working with DP/HDMI
- 2. Compatible Graphics Card: Recommend list is as the below, also could be checked by visiting www.AMD.com
- Radeon<sup>™</sup> RX Vega series
- Radeon<sup>™</sup> RX 500 series
- Radeon<sup>™</sup> RX 400 series
- Radeon<sup>™</sup> R9/R7 300 series (R9 370/X, R7 370/X, R7 265 except)
- Radeon<sup>™</sup> Pro Duo (2016)
- Radeon<sup>™</sup> R9 Nano series
- Radeon<sup>™</sup> R9 Fury series
- Radeon<sup>™</sup> R9/R7 200 series (R9 270/X, R9 280/X except)

## HDR

It is compatible with input signals in HDR10 format.

The display may automatically activate the HDR function if the player and content are compatible. Please contact the device manufacturer and the content provider for information on the compatibility of your device and content. Please select "OFF" for the HDR function when you have no need for automatical activation function.

#### Note:

- 1. No special setting is needed for the DisplayPort/HDMI interface in WIN10 versions lower (older) than V1703.
- 2. Only the HDMI interface is available and the DisplayPort interface cannot function in WIN10 version V1703.
- a. The display resolution is set to 2560\*1440, and HDR is preset to ON. Under these conditions, the screen may slightly dim, indicating HDR has been activated.
- b. After entering an application, the best HDR effect can be achieved when the resolution is changed to 2560\*1440 (if available).

# Troubleshoot

Problem & Question	Possible solutions			
Power LED is not ON	Make sure the power button is ON and the power cord is properly connected to a grounded power outlet and to the monitor.			
No images on the screen	<ul> <li>Is the power cord connected properly? Check the power cord connection and power supply.</li> <li>Is the video cable connected correctly? (Connected using the D-SUB cable) Check the D-SUB cable connection. (Connected using the HDMI cable) Check the HDMI cable connection. (Connected using the DP cable) Check the DP cable connection.</li> <li>*D-SUB/HDMI/DP input is not available on every model.</li> <li>If the power is on, reboot the computer to see the initial screen (the login screen.) If the initial screen (the login screen) appears, boot the computer in the applicable mode (the safe mode for Windows 7/8/10) and then change the frequency of the video card. (Refer to the Setting the Optimal Resolution) If the initial screen (the login screen) does not appear, contact the Service Center or your dealer.</li> <li>Can you see "Input Not Supported" on the screen? You can see this message when the signal from the video card exceeds the maximum resolution and frequency that the monitor can handle properly. Adjust the maximum resolution and frequency that the monitor can handle properly.</li> <li>Make sure the AOC Monitor Drivers are installed.</li> </ul>			
Picture is fuzzy and has ghosting shadowing problem	Adjust the Contrast and Brightness Controls. Press hot-key (AUTO) to auto-adjust. Make sure you are not using an extension cable or switch box. We recommend plugging the monitor directly to the video card output connector on the back.			
Picture bounces, flickers or wave pattern appears in the picture	Move electrical devices that may cause electrical interference as far away from the monitor as possible. Use the maximum refresh rate your monitor is capable of at the resolution you are using.			
Monitor is stuck in "Active Off- Mode"	The computer power switch should be in the ON position. The computer video card should be snugly fitted in its slot. Make sure the monitor's video cable is properly connected to the computer. Inspect the monitor's video cable and make sure no pin is bent. Make sure your computer is operational by hitting the CAPS LOCK key on the keyboard while observing the CAPS LOCK LED. The LED should either turn ON or OFF after hitting the CAPS LOCK key.			
Missing one of the primary colors (RED, GREEN, or BLUE)	Inspect the monitor's video cable and make sure that no pin is damaged. Make sure the monitor's video cable is properly connected to the computer.			
Screen image is not centered or sized properly	Adjust H-Position and V-Position or press hot-key (AUTO).			
Picture has color defects (white does not look white)	Adjust RGB color or select desired color temperature.			
Horizontal or vertical disturbances on the screen	Use Windows 7/8/10 shut-down mode to adjust CLOCK and FOCUS. Press hot-key (AUTO) to auto-adjust.			
Regulation & Service	Please refer to Regulation & Service Information which is in the CD manual or www.aoc.com (to find the model you purchase in your country and to find Regulation & Service Information in Support page).

## **Plug and Play**

#### Plug & Play DDC2B Feature

This monitor is equipped with VESA DDC2B capabilities according to the VESA DDC STANDARD. It allows the monitor to inform the host system of its identity and, depending on the level of DDC used, communicate additional information about its display capabilities.

The DDC2B is a bi-directional data channel based on the I2C protocol. The host can request EDID information over the DDC2B channel.
