

### Main features

- The Loop Mix function lets you perform great-sounding music simply by selecting a genre and pressing keys. You can perform easily, without paying attention to pitch or timing. In addition, you can use the performance pads to apply effects in real time.
- Bluetooth functionality allows interoperation with your smartphone or tablet. Music or the audio from a music video on your smartphone or tablet can be played via this instrument while you perform along with the music. You can also use this instrument's keyboard to play a music app that supports Bluetooth MIDI (only for units equipped with Bluetooth).
- The portable all-in-one design is compact and light-weight, featuring batterypowered operation, built-in high-quality speakers, and a stylish shape that's free of protrusions.

### Provision of Bluetooth functionality

Please be aware that depending on the country in which you purchased the unit, Bluetooth functionality might not be included.

### If Bluetooth functionality is included

The Bluetooth logo appears when you turn on the power.

Before using this unit, carefully read "USING THE UNIT SAFELY" and "IMPORTANT NOTES" (the leaflet "USING THE UNIT SAFELY" and the Owner's Manual (p. 13)). After reading, keep the document(s) where it will be available for immediate reference. Copyright © 2017 ROLAND CORPORATION

## **Operating Guide**

### Selecting a Tone

This instrument lets you enjoy performing with a variety of tones.

The tones are organized into eight groups, and are assigned to the corresponding tone buttons.

- 1. Press a tone button such as [PIANO], and then use the [-] [+] buttons.
  - If a tone other than a drum tone is selected: " I is lit

If a drum tone is selected: " @ " is lit

### Reference

For details on the tones, refer to "Tone List" at the end of this manual.

0 - 20

Tone groups		
Button	Explanation	
[PIANO] button	Piano tones	
[ORGAN] button	Organ tones	
[STRINGS] button	Strings tones	
[BRASS] button	Brass tones	
[DRUM] button	Drum tones	
[BASS] button	Bass tones	
[SYNTH] button	Synthesizer tones	
[FX/GUITAR] button	Sound effects/Guitar tones	

### Adjusting the Overall Volume

You can adjust the volume of the speakers if you're using the built-in speakers, or the volume of the headphones if headphones are connected.

Adjusting the volume

### Applying an Effect to the Performance

While performing, you can vary the pitch or apply vibrato by touching your fingertip to the performance pad and moving it left or right.

Upper row	
Lower row	
Upper row	Vary the pitch or apply
•••••	vibrato, etc.
Lower row	Pitch change
Applying	a roll or filter effect

The effect that's applied when you touch the performance pad can be switched between roll and filter.

### 1. Press the [FUNC] button (" 🕂 " is lit).

Upper row	Filter effect
Lower row	Roll effect

### Playing Back / Recording

Here's how to play back or record a song.

Play/Stop	Press the [►/■] button.
Record-standby	While stopped, press the [•] button.
Record	From record-standby, press the [►/■] button.
Load a different song	Loading a saved song (Load) (p. 7).

### New recording

- 1. Select the sound (part) that you want to record.
- 2. Press the [●] button ("●" blinks). A count is heard in time with the tempo of the song (p. 8).
- 3. Play the keyboard to start recording ("●" is lit).
- 4. Press the [►/■] button to stop ("●" is unlit).
  - A confirmation message appears.
- 5. To save, press the [ENTER] button. If you decide to cancel, press the [EXIT] button.

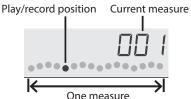

### Overdubbing

- 1. Select a different sound (part) than you recorded in "New recording." Alternatively, you can select the same sound and overdub it.
- 2. Press the [●] button ("●" blinks).
- 3. Play the keyboard to start recording ("●" is lit).
- 4. Press the [►/■] button to stop ("●" is unlit).
  - A confirmation message appears.
- 5. To save, press the [ENTER] button. If you decide to cancel, press the [EXIT] button.

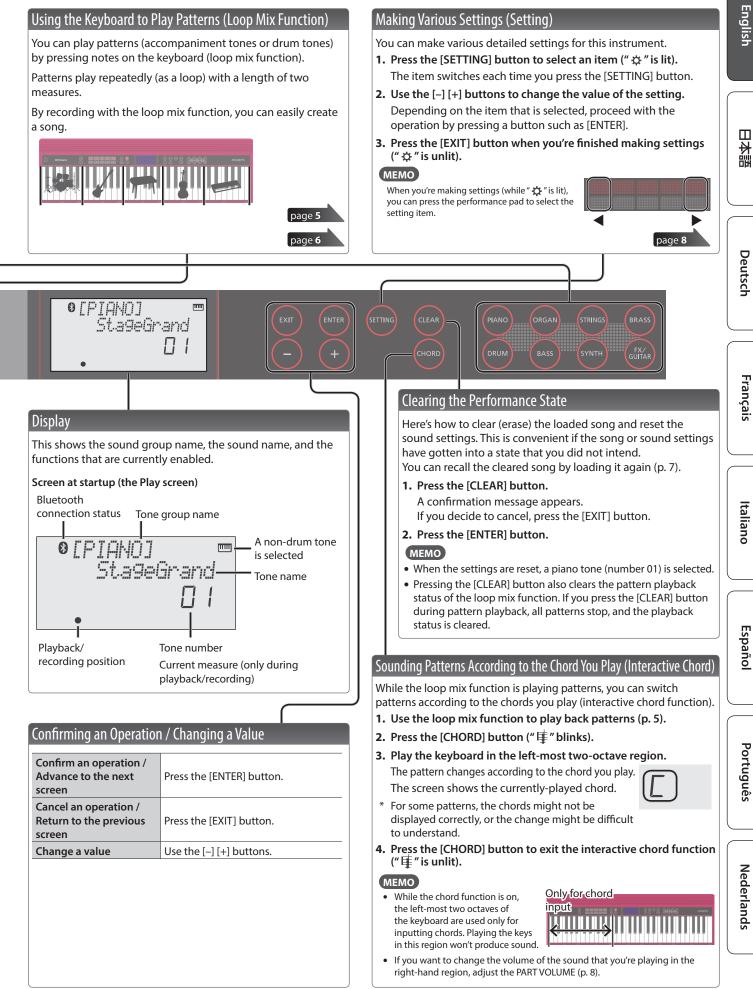

### About the recording function

This instrument lets you overdub, where a performance using one of the tone buttons is considered as one part.

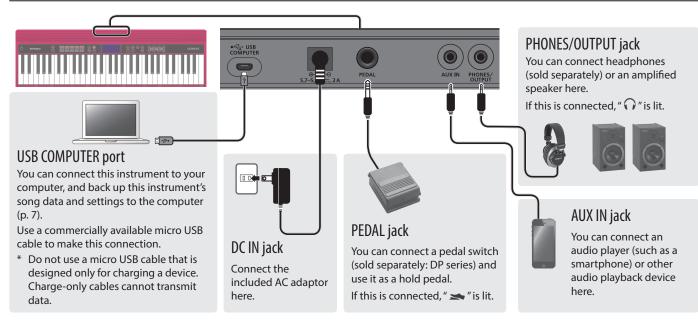

Tone button Song PIANO Piano part Organ part ORGAN STRINGS Strings part BRASS Brass tones FX/GUITAR # FX/Guitar tones When playing back or recording, the screen shows the current measure, and the status of play/record progress within one measure.

### **Operating Guide**

## Connecting Equipment

\* To prevent malfunction and equipment failure, always turn down the volume, and turn off all the units before making any connections.

### **Installing Batteries**

If six commercially available nickel-metal hydride or alkaline AA batteries are installed, you can perform without connecting an AC adaptor.

- **1.** Remove the battery cover.
- 2. Install the batteries, making sure that they are oriented correctly.
- 3. Close the battery cover.
  - \* If you handle batteries improperly, you risk explosion and fluid leakage. Make sure that you carefully observe all of the items related to batteries that are listed in "USING THE UNIT SAFELY" and "IMPORTANT NOTES" (leaflet "USING THE UNIT SAFELY" and Owner's Manual p. 13).
  - \* When the batteries run low, the display indicates "Battery Low!" When this occurs, install fresh batteries.

## Turning the Power On/Off

- **1.** Press the [0] (power) button to turn on the power.
- 2. Use the [◀·] [◀·))] buttons to adjust the volume.
- 3. To turn the power off, hold down the [0](power) button for one second or longer.

### Concerning the Auto Off function

The power to this unit will be turned off automatically after a predetermined amount of time has passed since it was last used for playing music, or its buttons or controls were operated (Auto Off function).

If you do not want the power to be turned off automatically, disengage the Auto Off function (p. 9).

### NOTE

To restore power, turn the power on again.

## Performing with the Loop Mix Function

Loop mix is a function that lets you play patterns (accompaniment tones or drum tones) by pressing notes on the keyboard.

Patterns for each tone part are assigned to five areas of the keyboard. These five areas are collectively called a "loop mix set."

One pattern can be played in each area; patterns are two measures long, and play back repeatedly (as a loop).

In every loop mix set, a drum pattern is assigned to area 1 and a bass pattern is assigned to area 2.

This instrument lets you enjoy performing with loop mix sets that cover a wide variety of musical genres.

\* The song function and the loop mix function can't be used at the same time.

### MEMO

- You can change the tempo of the pattern (p. 8).
- Only in area 5, you can play patterns with multiple tone parameters. You can also press multiple keys at the same time to play them simultaneously.
- For details on the loop mix sets and patterns, refer to "Loop Mix Set List" at the end of this manual.

Here we explain the procedure for performing a bass tone while sounding a drum tone.

### Selecting a loop mix set

### 1. Press the [LOOP MIX] button to turn the loop mix function on (" 🆺 " is lit).

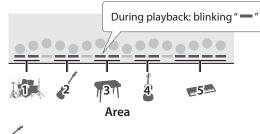

If you press the [LOOP MIX] button while a song is loaded, the display indicates "CLEAR SONG?" If you want to use the loop mix function, press the [ENTER] button to clear the song. You can recall the cleared song by loading it again (p. 7).

### 2. Use the [-] [+] buttons to select the loop mix set that you want.

## Playing a drum part pattern

### 3. Press one of the keys in area 1.

A drum tone pattern sounds.

Playing a bass part pattern

lo stop the patter	llS
	Press the right-most key of the area whose pattern you want to stop.
To stop one pattern	
To stop all patterns	Press the [▶/■] button. If you press the [▶/■] button once again, the patterns play in the previous state.

### 4. Press keys in area 2 one at a time.

A bass tone pattern sounds.

If you want to add more parts to the playback, press keys in each of the other areas.

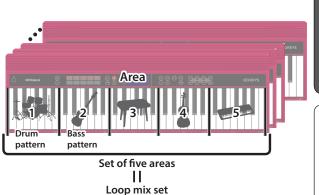

### 5. Press the [LOOP MIX] button to return to the normal performance state (" 🗳 " is unlit).

To stop the pattern, press the [►/■] button.

## Playing Patterns According to the Chord You Play (Interactive Chord)

While the loop mix function is playing patterns, you can use the interactive chord function to vary the patterns according to the chords that you play.

For more about the interactive chord function, refer to "Sounding Patterns According to the Chord You Play (Interactive Chord)" (p. 3).

English

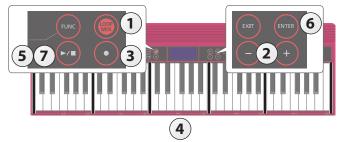

田本語

5

You can easily create a song by recording with the loop mix function.

\* If you want to record a new song, clear the song before you proceed (p. 3).

Here we explain the procedure for recording the drum tone and bass tone.

### Selecting a loop mix set

- 1. Press the [LOOP MIX] button to turn the loop mix function on (" 🆺 " is lit).
- 2. Use the [-] [+] buttons to select the loop mix set that you want.

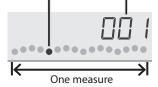

### Recording your performance

- 3. Press the [●] button ("●" blinks).
  - Now you're in the record-standby state.

### **4.** Press a key in each area to start recording ("●" is lit).

When you press a key, recording starts and the number of recorded measures is shown in the screen.

Record position Current measure

### MEMO

Your performance using the interactive chord function (p. 3) is also recorded.

### 5. Press the [►/■] button to stop recording ("●" is unlit).

A confirmation message appears.

### 6. To save, press the [ENTER] button.

If you decide to cancel, press the [EXIT] button.

### 7. When you once again press the [►/■] button, the recorded performance plays back.

## Loading a Song (SONG LOAD)

Here's how to load a song that's saved in internal memory.

- \* When you load a song, the recorded data of the current song is lost. If you've created a song that you want to keep, you should save it.
- **1.** Press the [SETTING] button several times to make the display indicate SONG LOAD.

### 2. Press the [ENTER] button.

**3.** Use the [-] [+] buttons to select the song that you want to load.

### 4. Press the [ENTER] button.

When a song is loaded, the indicator in the lower part of the screen is lit.

## Deleting a Song (SONG DEL)

Here's how to delete a song that's saved in internal memory.

1. Press the [SETTING] button several times to make the display indicate SONG DEL.

- 2. Press the [ENTER] button.
- **3.** Use the [-] [+] buttons to select the song that you want to delete.

### 4. Press the [ENTER] button.

A confirmation message appears.

If you decide to cancel, press the [EXIT] button.

### 5. Press the [ENTER] button.

The song is deleted.

# Backing-Up or Restoring Songs and Settings

Songs (SMF format) and settings that you've saved in this instrument can be backed-up to your computer. Songs and settings that you've backed-up on your computer can also be restored to this instrument.

<sup>4</sup> Before you execute backup or restore, use a micro USB cable to connect this instrument to your computer.

### MEMO

Since songs are in SMF format, you can use them in your DAW or other music software.

### Backing Up (BACKUP)

**1.** Press the [SETTING] button several times to make the display indicate BACKUP.

2. Press the [ENTER] button.

The BACKUP drive appears in the screen of your computer.

- **3.** Copy the GO-61 folder of the BACKUP drive to your computer.
  - \* Copy this entire "GO-61" folder to your computer. Similarly when executing restore, copy the entire "GO-61" folder. Backup or restore won't occur correctly if you copy just the folder that's inside the "GO-61" folder, or if you copy only some of the files.

# 4. On your computer, perform the appropriate steps to end (unmount) the connection with this instrument.

The normal screen of this instrument reappears.

### MEMO

When backing up or restoring data, there might be cases in which backup or restore does not proceed even if you end (unmount) the connection on your computer.

If so, end the connection on your computer, and then press the [EXIT] button of this instrument.

If you're using a Mac, end the connection; then when you're finished, press this instrument's [EXIT] button.

Español

田本語

Deutsch

Français

Italiano

### **Restoring (RESTORE)**

**1.** Press the [SETTING] button several times to make the display indicate RESTORE.

### **2.** Press the [ENTER] button.

The RESTORE drive appears in the screen of your computer.

- **3.** Copy the GO-61 folder into the RESTORE drive.
- **4.** On your computer, perform the appropriate steps to end (unmount) the connection with this instrument.

When the connection is ended, restore begins.

When restore is completed, the screen indicates "Completed. TurnOffPower."

**5.** Turn the power of this instrument off and on again (p. 4).

## Restoring the Factory Settings (FACTORY RST)

Here's how the settings of this instrument can be returned to their factory-set state. This operation is called factory reset.

### NOTE

When you execute this operation, all songs and settings saved in this instrument are lost. If there are songs that you want to keep, back them up to your computer (p. 7).

1. Press the [SETTING] button several times to make the display indicate FACTORY RST.

### 2. Press the [ENTER] button.

A confirmation message appears.

If you decide to cancel, press the [EXIT] button.

### 3. Press the [ENTER] button.

The factory reset is executed.

## Setting Various Functions (Setting)

MEMO

## **Basic Operations in Setting**

1. Press the [SETTING] button to select an item (" ☆ " is lit).

The item switches each time you press the [SETTING] button

- **2.** Use the [-] [+] buttons to change the value of the setting.
- **3.** Press the [EXIT] button when you're finished making settings (" ☆ " is unlit).
- When you're making settings (while " " is lit), you can press the performance pad to select the setting item.

• The lower part of the screen shows the position of the selected item.

• These settings can be backed up (p. 7).

### Provision of Bluetooth functionality

Please be aware that depending on the country in which you purchased the unit, Bluetooth functionality might not be included. If Bluetooth functionality is included

The Bluetooth logo appears when you turn on the power.

## Here's What You Can Do

Bluetooth functionality creates a wireless connection between a mobile device such as a smartphone or tablet (subsequently referred to as the "mobile device") and this unit, allowing you to do the following.

### Bluetooth audio

You can use the speakers of this instrument to listen to music or music videos played on your mobile device.

### MIDI data transmission and reception

MIDI data can be exchanged between this unit and the mobile device.

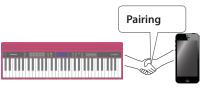

You can use the keyboard of this instrument to play a music app that supports Bluetooth MIDI.

## **Using Bluetooth Audio**

\* The volume of the Bluetooth audio cannot be adjusted from this unit. Adjust the volume on the mobile device.

## Registering a Mobile Device (Pairing)

"Pairing" is the procedure by which the mobile device that you want to use is registered on this unit (the two devices recognize each other).

Make settings so that music data saved on the mobile device can be played wirelessly via this unit.

### MEMO

- Once a mobile device has been paired with this unit, there is no need to perform pairing again. If you want to connect this unit with a mobile device that has already been paired, refer to "Connecting an Already-Paired Mobile Device" (p. 10).
- Pairing is required again if you execute a Factory Reset (p. 8).
- The following explanation of the procedure is only one example. For details, refer to the owner's manual of your mobile device.
- \* Make sure that this unit's Bluetooth function is "On" (settings → "BLUETOOTH" turned "On").

## 1. Place the mobile device that you want to connect nearby this unit.

### MEMO

If you have more than one unit of this model, power-on only the unit that you want to pair (power-off the other units).

## **2.** Press the [SETTING] button several times to make the display indicate BT PAIRING.

### 3. Press the [ENTER] button.

The display indicates "PAIRING...," and this unit waits for a response from the mobile device.

### MEMO

If you decide to cancel pairing, press the [Exit] button.

## **4.** Turn on the Bluetooth function of the mobile device.

<b>〈</b> Settings	Bluetooth	
		$\frown$
Bluetooth		
DEVICES		

### MEMO

The explanation here uses the iPhone as an example. For details, refer to the owner's manual of your mobile device.

**5.** Tap "GO:KEYS Audio" that is shown in the Bluetooth device screen of your mobile device.

This unit is paired with the mobile device. When pairing succeeds, "GO:KEYS Audio" is added to the list of "Paired Devices" on your mobile device.

## **6.** Press the [EXIT] button when you're finished making settings.

### Specifying the Bluetooth ID

You can specify a number that is added following the device name of this unit when it is displayed by a Bluetooth connected application.

If you own multiple units of the same instrument, this is a convenient way to distinguish them.

- 1. Press the [SETTING] button several times to make the display indicate BLUETOOTH ID.
- **2.** Use the [-] [+] buttons to edit the value of the setting.

Parameter	Explanation
Off, 1–9	Set to "Off": " GO:KEYS Audio," "GO:KEYS MIDI" (default value)
	Set to "1": "GO:KEYS Audio 1," "GO:KEYS MIDI 1"

### Connecting an Already-Paired Mobile Device

## 1. Turn on the Bluetooth function of the mobile device.

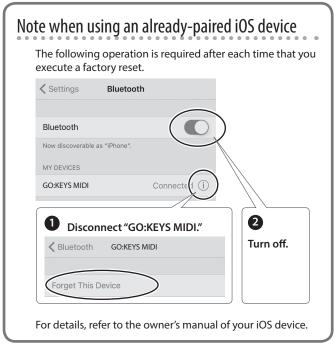

### MEMO

- If you were unable to establish a connection using the procedure above, tap "GO:KEYS Audio" that is displayed in the Bluetooth device screen of the mobile device.
- To disconnect, either turn this unit's Bluetooth Audio function "Off" (Setting → turn "BLUETOOTH" Off) or turn the mobile device's Bluetooth function off.

# English

## Transferring MIDI Data

Here's how to make settings for transmitting and receiving MIDI data between this unit and the mobile device.

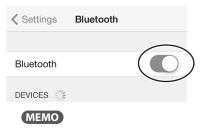

- \* Make sure that this unit's Bluetooth function is "On" (settings → "BLUETOOTH" turned "On").
- 1. Place the mobile device that you want to connect nearby this unit.

### MEMO

If you have more than one unit of this model, power-on only the unit that you want to pair (power-off the other units).

## 2. Turn on the Bluetooth function of the mobile device.

The explanation here uses the iPhone as an example. For details, refer to the owner's manual of your mobile device.

## **3.** In the mobile device's app (e.g., GarageBand), establish a connection with this unit.

### NOTE

Do not tap the "GO:KEYS MIDI" that is shown in the Bluetooth settings of the mobile device.

## Disabling the Bluetooth Functionality

Disable the Bluetooth functionality if you don't want this unit to be connected via Bluetooth with your mobile device.

- **1.** Press the [SETTING] button several times to make the display indicate BLUETOOTH.
- 2. Use the [-] [+] buttons to turn the setting "Off."
- **3.** Press the [EXIT] button when you're finished making settings.

## Troubleshooting

Problem	Items to check	Action	Page
Power turns off on its own	Could the auto-off setting be something other than "Off"?	If you don't need the power to turn off automatically, turn the Auto Off setting "Off."	p. 9
	Is the AC adaptor connected correctly?		_
	Could the batteries be exhausted?	Install fresh batteries.	p. 4
Power turns on unexpectedly	If you connect the AC adaptor and turn on the power when batteries are installed, the AC adaptor will be used preferentially. Even if batteries are installed, the power will not turn on unless the AC adaptor is connected to an AC outlet.		
	If you're using batteries, disconnect the AC adaptor from this unit. If batteries are installed, connecting or disconnecting the power cord from the outlet or connecting or disconnecting the DC plug of the AC adaptor while this unit is turned on will cause the power to turn off.		_
Pedal does not work, or is "stuck"	Is the pedal connected correctly?		p. 4
The volume level of the unit connected to AUX IN jack is too low	Could the volume of the connected device be turned down?		_
	Are your amp, speakers, headphones, etc., connected correctly?		p. 4
	Is the volume turned down?		p. 2
	Could the interactive chord function be turned on?	Turn off the interactive chord function.	p. 3
No sound		While the chord function is on, the left-most two octaves of the keyboard are used only for inputting chords. Playing the keys in this region won't produce sound.	
Notes don't sound right			
The notes you play on the keyboard don't sound	Could the loop mix function be turned on?	Turn off the loop mix function.	p. 5
The notes have the wrong pitch	Could you have changed the transpose	setting?	p. 9

Can't connect to	In some cases, the connection with the mobile device might become unavailable when you switch the Bluetooth MIDI function.			
Bluetooth MIDI	After unpairing the "GO:KEYS MIDI" that is registered on the mobile device, turn the mobile device's Bluetooth function off and then on again, and reconnect it.			
Can't connect via MIDI	You must make the connection not from the mobile device's Bluetooth setting but from the setting within GarageBand or other app that you're using.			
Can't establish pairing with the MIDI function	The MIDI function is paired when you first select a device on the mobile device and establish a connection. There is no need to initiate pairing from this unit.			
Can't connect a paired mobile device	If the connection breaks immediately after it is established, turning the Bluetooth device's Bluetooth switch off and then on again may allow connection to occur.			

. .

### MEMO

If checking these points does not solve the problem, please refer to the Roland support website. http://www.roland.com/support/

### WARNING

#### **Concerning the Auto Off function**

The power to this unit will be turned off automatically after a predetermined amount of time has passed since it was last used for playing music, or its buttons or controls were operated (Auto Off function). If you do not want the power to be turned off automatically, disengage the Auto Off function (p. 9).

### Use only the stand that is recommended

This unit should be used only with a stand that is recommended by Roland.

#### Do not place in a location that is unstable

recommended by Roland, the stand must be carefully placed so it is level and sure to remain stable. If not using a stand, you still need to make sure that any location you choose for placing the unit provides a level surface that will properly support the unit, and keep it from wobbling.

### WARNING

#### Precautions regarding placement of this unit on a stand

Be sure to follow the instructions in the Owner's Manual carefully when placing this unit on a stand (p. 14).

If it is not set up properly, you risk creating an unstable situation which could lead to the unit falling or the stand toppling, and may result in injury.

### Use only the supplied AC adaptor and the correct voltage

Be sure to use only the AC adaptor supplied with the unit. Also, make sure the line voltage

at the installation matches the input voltage specified on the AC adaptor's body. Other AC adaptors may use a different polarity, or be designed for a different voltage, so their use could result in damage, malfunction, or electric

shock.

### **CAUTION**

### Use only the specified stand(s)

This unit is designed to be used in combination with specific stands (KS-12) manufactured by Roland. If used in combination with other stands, you risk sustaining injuries as the result of this product dropping down or toppling over due to a lack of stability.

### Evaluate safety issues before using stands

Even if you observe the cautions given in the owner's manual, certain types of handling may allow this product to fall from the stand, or cause the stand to overturn. Please be mindful of any safety issues before using this product.

## **IMPORTANT NOTES**

#### **Power Supply: Use of Batteries**

- If operating this unit on batteries, please use alkaline batteries, rechargeable Ni-MH batteries.
- · Even if batteries are installed, the power turns off if the power cord is disconnected from the AC outlet while the power is on, or if the AC adaptor is disconnected from this instrument. In this case, unsaved data might be lost. Be sure to turn off the power before you disconnect the power cord or the AC adaptor.

#### Placement

- · Do not allow objects to remain on top of the keyboard. This can be the cause of malfunction, such as keys ceasing to produce sound.
- · Depending on the material and temperature of the surface on which you place the unit, its rubber feet may discolor or mar the surface.

#### **Repairs and Data**

· Before sending the unit away for repairs, be sure to make a backup of the data stored within it; or you may prefer to write down the needed information. Although we will do our utmost to preserve the data stored in your unit when we carry out repairs, in some cases, such as when the memory section is physically damaged, restoration of the stored content may be impossible. Roland assumes no liability concerning the restoration of any stored content that has been lost.

### **Care of the Keyboard**

- · Do not write on the keyboard with any pen or other implement, and do not stamp or place any marking on the instrument. Ink will seep into the surface lines and become unremovable.
- Do not affix stickers on the keyboard. You may be unable to remove stickers that use strong adhesives, and the adhesive may cause discoloration.
- To remove stubborn dirt, use a commercially available keyboard cleaner that does not contain abrasives. Start by wiping lightly. If the dirt does not come off, wipe using gradually increasing amounts of pressure while taking care not to scratch the keys.

#### **Additional Precautions**

- Any data stored within the unit can be lost as the result of equipment failure, incorrect operation, etc. To protect yourself against the irretrievable loss of data, try to make a habit of creating regular backups of the data you've stored in the unit.
- Roland assumes no liability concerning the restoration of any stored content that has been lost.
- Never strike or apply strong pressure to the display.
- · Do not use connection cables that contain a built-in resistor.

#### **Caution Regarding Radio Frequency Emissions**

- The following actions may subject you to penalty of law.
  - Disassembling or modifying this device.
  - Removing the certification label affixed to the back of this device.

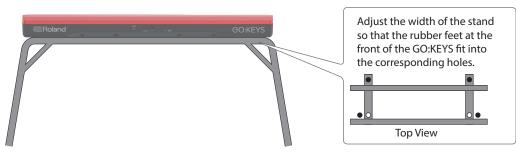

Español

#### **Intellectual Property Right**

- It is forbidden by law to make an audio recording, video recording, copy or revision of a third party's copyrighted work (musical work, video work, broadcast, live performance, or other work), whether in whole or in part, and distribute, sell, lease, perform, or broadcast it without the permission of the copyright owner.
- Do not use this product for purposes that could infringe on a copyright held by a third party. We assume no responsibility whatsoever with regard to any infringements of third-party copyrights arising through your use of this product.
- The copyright of content in this product (the sound waveform data, style data, accompaniment patterns, phrase data, audio loops and image data) is reserved by Roland Corporation.
- Purchasers of this product are permitted to utilize said content (except song data such as Demo Songs) for the creating, performing, recording and distributing original musical works.
- Purchasers of this product are NOT permitted to extract said content in original or modified form, for the purpose of distributing recorded medium of said content or making them available on a computer network.
- The Bluetooth<sup>®</sup> word mark and logos are registered trademarks owned by Bluetooth SIG, Inc. and any use of such marks by Roland is under license.
- Roland and GO:KEYS are either registered trademarks or trademarks of Roland Corporation in the United States and/or other countries.
- Company names and product names appearing in this document are registered trademarks or trademarks of their respective owners.

### Placing This Unit on a Stand

Be careful not to pinch your fingers when setting up the stand (KS-12; sold separately). Place the instrument on the stand as follows.

### **Main Specifications**

Roland GO:KEYS	: Music Creation Keyboard		
Keyboard	61 keys (Ivory Feel and Box-shape Keys with velocity)		R
Bluetooth	Bluetooth Ver 4.2 Profile Support: A2DP (Audio), GATT (MIDI over Bluetooth Low Energy)	Battery Life for Continuous Use	hi   A   hi
	Codec: SBC (Support to the content protection of the SCMS-T method)		*
Power Supply	AC adaptor or Alkaline battery (AA, LR6) / Rechargeable Ni-MH battery (AA, HR6) x 6	Dimensions	8: 34
	* Carbon-zinc batteries cannot be used.	Weight	3.
Current Draw	1,000 mA	Accessories	0 5/

	Rechargeable Ni-MH batteries (AA, HR6): Approximately 6 hours (When using batteries having a capacity of 1,900 mAh.)		
Battery Life for Continuous Use	Alkaline batteries (AA, LR6): Approximately 4 hours		
	* This figure will vary depending on the actual conditions of use.		
Dimensions	877 (W) x 271 (D) x 82 (H) mm		
Dimensions	34-9/16 (W) x 10-11/16 (D) x 3-1/4 (H) inches		
Weight	3.9 kg/8 lbs 10 oz (excluding AC adaptor)		
Accessories	Owner's manual, Leaflet "USING THE UNIT SAFELY," AC adaptor		
Options	Keyboard stand: KS-12		
(sold separately)	Pedal switch: DP series		

\* This document explains the specifications of the product at the time that the document was issued. For the latest information, refer to the Roland website.
