Solo10G[™] SFP+ Thunderbolt[™] 3 Edition

10 Gigabit Ethernet to Thunderbolt 3 Adapter with 10GBASE-SR (Short-range) SFP+ Transceiver

Quick Start Guide

Mac® Compatibility

- Mac with Thunderbolt 3 ports
- macOS® 10.13.6+
- macOS Mojave compatible

Windows® Compatibility

- PC with Thunderbolt 3 ports
- 64-bit editions of Windows® 10, Version 1709 (Creator's Edition), or later

Important Note: Windows computers require the latest BIOS and Thunderbolt drivers to support this product. Check with your computer manufacturer for update information.

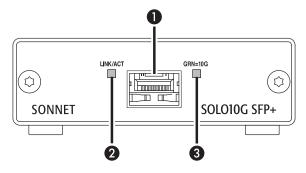

Linux® Compatibility

- PC with Thunderbolt 3 ports
- Linux Kernel 5.0 or later

Support Note: This document was up to date at the time of printing. However, changes to the hardware or software may have occurred since then. Please check the Sonnet website for the latest documentation.

- 1. Go to www.sonnettech.com/support/kb/kb.php
- 2. Click the Thunderbolt link.
- 3. Locate and click Solo10G SFP+ Thunderbolt 3 Edition link, and then click the Manual link.
- 4. Click the Solo10G SFP+ Thunderbolt 3 Edition Quick Start Guide [English] link, and then check the Document Version information. If the version listed is later than this document (revision B), click the Download Now button for the latest version.

Solo10G SFP+ Thunderbolt 3 Edition (T3E) Description

1 - SFP+ Socket

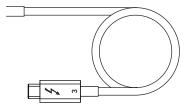

Insert the included short-range SFP+ optical transceiver into the socket, making sure it is firmly seated and secured. Alternatively, you can install a long-range SFP+ transceiver or an RJ45 SFP+ copper transceiver (both sold separately). You may even use a direct-attached SFP+ terminated copper cable up to 10 meters long (sold separately) to connect to a switch or storage system.

2 - Link/Activity Indicator

This LED lights up green to indicate a link is established between the adapter and the switch, and flashes yellow when the link is training.

3 – Link Speed Indicator

When a link is established between the adapter and the switch, this LED lights to indicate the link speed to the switch: green = 10Gb, yellow = lower speeds.

Thunderbolt 3 Connector—Plug this connector into one of your computer's Thunderbolt 3 ports (often indicated by a ½ logo), or at the end of a Thunderbolt device chain. Ports marked with the USB icon (are NOT compatible.

Driver Information

For Mac users, the drivers required to support the Solo10G adapter are installed as part of macOS 10.13.6 and later; the Sonnet adapter is ready for use when you power on your computer.

For Windows users, please go to www.sonnettech.com/support/kb/kb.php, and then click the Thunderbolt link. Locate and click Solo10G SFP+ Thunderbolt 3 Edition link, and then click the Driver link. Click the arrow to the left of Solo10G Software (Windows...) to read directions, and then click the Download Now button. Locate, download, and install the appropriate drivers.

For Linux users, the drivers required to support the Solo10G adapter are installed as part of Linux Kernel 5.0 and later.

2

Basic Configuration Information—macOS

With the Solo10G adapter connected to your computer and network infrastructure, configure the adapter's settings in the System Preferences' Network preferences panel. The adapter will be identified as Thunderbolt Ethernet Slot x.

Performance Tuning Steps—macOS

Listed below are steps required to configure the Solo10G SFP+ T3E adapter for maximum performance.

Support Note: In order to realize any performance increases, the network switches and server to which the Sonnet adapter is connected must all be configured to have jumbo frames enabled.

- 1. Open System Preferences, and then click Network. In the Network preferences panel, click the Solo10G adapter (Thunderbolt Ethernet, Slot x) in the left panel, and then click Advanced; a new panel appears.
- 2. In the Advanced panel, click Hardware. From the Configure drop-down menu, select "Manually". In the Speed drop-down menu, leave the setting at 10G... In the Duplex drop-down menu, select "full-duplex" (not "full duplex, flow-control"). In the MTU drop-down menu, select "Custom," and then enter "9000" in the box below.
- 3. When you've finished changing the settings, click OK.
- Back in the main Network window, click Apply after you've completed changing the settings.

Basic Configuration Information—Windows

Configure the Solo10G adapter's settings using Windows Device Manager. You may locate the device in the Network adapters category, listed as Sonnet Solo 10G SFP+ Thunderbolt 3 Edition.

First Time Use—Windows

The first time you connect the Solo10G SFP+ Thunderbolt 3 Edition adapter to your computer, an *Approve New Thunderbolt™ Devices* window will appear. From the drop-down menu select Always Connect, and then click OK.

Basic Confiruration Information—Linux

The steps necessary to configure the Sonnet adapter with your computer may vary based on the version of Linux running. Sonnet recommends using whatever method or tools you would normally use for configuring any onboard ports.
